

Profusion-HX represents a recent improvement in Hybrid Alfalfa using the patented *msSunstra Hybrid Alfalfa Technology*! This new product has familiar hybrid characteristics like dense stands with fine-stemmed herbage and fast recovery, but it comes with an exceptional boost in yield. This fine stem characteristic makes a dense, attractive alfalfa bale. It also makes a dense, attractive alfalfa bale and a tighter pack in bunker silos. **Profusion-HX** has shown to tolerate drier soils, thus not flowering as rapid under drought stress compared to non-hybrid alfalfas. For the highest forage yields of high-quality forage, **Profusion-HX** is the variety of choice.

Features

1. Highest forage yield potential
2. Highly productive in dry and wet production years
3. Fine stems
4. Rapid recovery after harvest
5. Drought tolerant
6. Extended harvest window
7. Excellent disease resistance
